Senior Laboratory Manager
Department of Microbiology
Icahn School of Medicine at Mount Sinai
New York, NY USA

The Department of Microbiology at the Icahn School of Medicine at Mount Sinai has an immediate opening for a Senior Laboratory Manager position in the Palese laboratory.

The Senior Laboratory Manager is responsible for the general operation of the laboratory. Duties will include ordering animals and ordering/stocking/organizing other laboratory consumables, shipping using regulatory procedures, overseeing glass wash and autoclave rooms, and training incoming staff on proper use of equipment, laboratory safety, biosafety, and fire safety. The recruit will work closely with Environmental Health and Safety on laboratory inspections and will maintain inventories of chemicals. They will be responsible for requesting MTAs and NDAs and will initiate/maintain animal protocols. The recruit will oversee and maintain departmental dark rooms, cold rooms, and microscope rooms. The Senior Laboratory Manager will work closely with the Engineering Department in regards to maintenance and repairs, and will also be responsible for the upkeep of the departmental freezer alarm system. In addition, the recruit will assist with laboratory relocations and renovations.

The ideal candidate will have:

- A Bachelor's or Master's degree(s) in sciences or a related field
- Experience working in a research environment

Candidates are expected to demonstrate a strong work ethic, a high degree of motivation, and be able to work independently.

About the Palese laboratory:

The Palese Laboratory and the Department of Microbiology focuses on fundamental questions concerning the genetic make-up and biology of viruses, as well as virus-host interactions. They use molecular biological techniques to understand how viruses replicate and how they interact with cells to cause disease in their hosts. Emphasis is on the study of RNA viruses, including influenza viruses, paramyxoviruses, and coronaviruses.
