

Association of Medical School Microbiology & Immunology Chairs

The Association of Medical School Microbiology and Immunology Chairs (AMSMIC) is a non-profit organization whose purpose is to promote, advance and support the educational and research missions of the fields of microbiology and immunology; and to provide a forum for communication, problem solving and public outreach among chairpersons of Departments of Microbiology and Immunology or directors of other organizational units responsible for teaching and research.

More specifically, the goals of AMSMIC include to support the education and training of medical students, graduate students and physicians who will be leaders of our scientific discipline in the future; to develop and implement means of improved dissemination of scientific discovery in our discipline; and to promote research funding by developing an optimally effective interface with agencies that support the scientific enterprise.
