

**Academic Position in Adaptive Immunology**  
**Department of Microbiology, Immunology and Infectious Diseases**  
**Cumming School of Medicine**

The Department of Microbiology, Immunology and Infectious Diseases, in conjunction with Snyder Institute for Chronic Diseases, at the Cumming School of Medicine, University of Calgary invites applications for a Tenure Track position at the rank of Assistant Professor or early Associate Professor in Adaptive Immunology.

Qualifications include a PhD or equivalent and postdoctoral fellowship experiences. The preferred applicant will have an established track record of performance in research leading to a better understanding of the role of adaptive immunology in microbial host defense and autoimmune disease and includes disease modifying therapy, including vaccines. The successful candidate must demonstrate evidence of an ability to collaborate, and potential to lead a research team, obtain CIHR grant support and effectiveness in teaching at the University level. Applicants at the Assistant Professor level must have evidence of a track record of first or corresponding author publications in high impact journals. Applicants at the Associate Professor level must present evidence of a strong publication record, as well as a demonstrated ability to obtain peer-reviewed funding.

The applicant will be recruited to the Department of Microbiology, Immunology and Infectious Diseases and will align with priorities and become a member of the Snyder Institute for Chronic Diseases. The successful applicant is expected to develop an independent research program in adaptive immunology research within a multidisciplinary research environment, will have a strong biomedical background and whose research interests and expertise would complement existing strengths and allied groups within the Cumming School of Medicine and core facilities including the International Microbiome Centre, a newly renovated Containment Level 3 facility, the Live Cell Imaging Centre and the Perkins Microbial Communities Core. Criteria for evaluation will include the extent to which the applicant's publications have had a high impact in the field and by which they have influenced subsequent publications. The potential to develop an independent research laboratory with a training program of high impact will be crucial. The successful applicant will be, in the opinion of the search and selection committee, the most likely to succeed in their research program and would have 75% of time protected for research. The successful recruit is expected to take advantage of a newly constructed wild microbiome facility.

The selected candidate will be expected to be committed to undergraduate education and teaching at the graduate level. Experience with lecturing and innovative educational approaches, course development and coordination, and a demonstrated record of contribution to undergraduate teaching is required. Successful applicants will also be expected to make contributions to areas of service.

The University of Calgary is Canada's leading next-generation university – a living, growing and youthful institution that embraces change and opportunity with a can-do attitude. Located in the nation's most enterprising city, the university is making tremendous progress on its Eyes High journey to be recognized as one of Canada's top five research universities, grounded in innovative learning and teaching and fully integrated with the community it both serves and leads. The University of Calgary inspires and supports discovery, creativity and innovation across all disciplines. For more information, visit [ucalgary.ca](http://ucalgary.ca).

Calgary is one of the world's cleanest cities and has been named one of the world's most livable cities for years. Calgary is a city of leaders - in business, community, philanthropy and volunteerism. Calgarians benefit from a growing number of world-class dining and cultural events and enjoy more days of sunshine per year than any other major Canadian city. Calgary is less than an hour's drive from the majestic Rocky Mountains and boasts the most extensive urban pathway and bikeway network in North America.

The Cumming School of Medicine seeks to recruit and retain a diverse and inclusive workforce that will contribute to creating the future of health. We are committed to fostering diversity through cultivating an environment where people with a variety of backgrounds, genders, interests, and talents feel welcome and supported. This includes the provision of a formal mentoring program, internal grant review programs that enhance success in research grant applications, pilot funding programs and other support programs.

The University of Calgary recognizes that candidates have varying career paths and that career interruptions can be part of an excellent academic record. Candidates are encouraged but not required to provide any relevant information about their experience and/or career interruptions to allow for a fair assessment of their application. Selection committees have been instructed to give careful consideration to, and be sensitive to the impact of career interruptions, when assessing the candidate's research productivity.

Interested individuals are encouraged to submit an application online via the 'Apply Now' link via the University of Calgary Careers site. Please be aware the application process allows for only four attachments. Your attachments should be organized to contain the following (which may require you to merge documents):

- Cover letter and curriculum vitae, including the name and contact information of three referees
- Statement of research interests and a description of a proposed 5-year research plan for the Chair
